

Pict. 1: GLA 2000-J

Pict. 2: GLA 2000-D

Pict. 3: sample tape end (others available)

DESCRIPTION

Large distances are easily cordoned off by the help of the **RS-GUIDESYSTEMS** post GLA 2000! Simply place the post by the help of the integrated rolls, handle the unit into position and extract the tapes up to an extension of 20 m each. Tapes can be fixed either by looping the tape and using the clamping at the tape end or by application of the **RS-GUIDESYSTEMS** wall clip (e.g. GLZ 45/3-074) as counter piece (not included).

Other, customized tape ends available upon request.

Delivery: assembled
