

The individually printed RS banner.

Pict. 1: GLA 30-A

Pict. 2: Sample application

DESCRIPTION

This individually printed banner can be either partially or completely extracted up to 2400 mm, which makes it universally suitable for both advertising and messaging purposes.

As the interchangeable banner can be swapped in less than one minute, the system is very easily adopted to every possible occasion. The new banner system is not only ideal for sole application, but can also be integrated into every existing **RS-GUIDESYSTEMS** queue management and barrier solution.

Delivery: assembled
